

Basilio Saldarriaga Giraldo

Systems Engineer

I'm a person with high values; I consider myself dynamic, active, committed, collaborative and responsible. I always maintain motivation and discipline to learn different things about software development and testing. In my performance I feel able to: Provide support in all areas that require working according to the needs of the company proceeding properly, being part of the solutions of the problems applying the knowledge acquired or seeking alternative solutions in a self-taught way.
